PERSONAL PROFILE:

I am a highly motivated and driven individual with a strong interest in web development. I have recently returned from spending the last 10 months in New Zealand where I met a variety of people from different backgrounds, countries and cultures. I now hope to apply my skills gained from further education, work and personal projects to a great company and continue to develop myself personally and professionally.

EDUCATION & QUALIFICATIONS:

Business Information Systems BSc - Cardiff University, Wales UK [2:1]

Studying the intrinsic link between computing and technology and the strategic business needs of a modern organisation. Developing business, technical and analytical skills.

Completing a range of modules including; Developing Quality Software, Web Applications, Database Systems, Human Computer Interaction and many more.

Extended Diploma in IT - City of Newport Campus, Wales UK [DISTINCTION*]

Taught a blend of technical skills with the business, interpersonal and project management skills that are needed not only by the IT sector, but by all the sectors using technology in a modern business environment.

Involving modules such as; Website Production, Database Design, System Analysis & Design, Software Design & Development, Troubleshooting & Repair and more.

WORK EXPERIENCE:

Freelance Web Developer (January 2018 - present)

Since returning from New Zealand I have been actively working to develop my web development skills by working as a freelance Web Developer.

This has involved developing websites for small businesses.

Software Developer at X4 Software – (July 2016 – January 2017)

Junior developer working with new and existing products, structuring and processing online product data to be analysed and presented to customers.

The core technologies involved were HTML, CSS, JavaScript and jQuery.

SKILLS & INTERESTS:

Teamwork

Loyal and dedicated team player that understands, that although the role of an individual is important, the cohesion of a team is a critical factor in developing high-quality products. This was made prominent at X4 Software where the Scrum development methodology was deployed, as productivity was significantly improved by increased team cohesion.

Communication

When working in a team communication is key. From my experience I have learnt to; adapt my message depending on the audience, make all presentations clear and finally ensure information provided is concise and relevant.

Problem-solving

Problem solving is a huge element of programming. From my experience of developing web applications I have learnt to effectively analyse and resolve a problem in order to ensure an end goal is achieved.

Technical

Experience in a range of technologies, including; HTML, CSS, JavaScript, jQuery, PHP, MySQL and Git.

Leadership

Previously gained experience of leading projects both at university and X4 software. Whilst at X4 software I co-ordinated and led a small team of outsourcers by scheduling skype meetings, evenly distributing workloads and supporting team members.
